

# expressWay

## MARKET DATA

The expressWay™ Market Data appliance excels during times of market volatility and rapidly fluctuating trade volumes, and can handle data volumes and speeds far surpassing those seen today.

This market data appliance is a reliable, cost-effective, multi-asset ticker plant delivering data at unsurpassed speeds. It uses multi-core processors to minimize movement of data between servers and provides access to market data from a broad range of feeds, exchanges and ATSS. Users need only a single, direct connection to any of Mantara’s data center colocation sites to access information quickly and securely.

### Features

expressWay Market Data:

- Handles over 10 million messages per second with ultra-low latency performance
- Meets the demanding requirements of algorithmic and automated trading strategies
- Ensures extra-high reliability by providing multiple sources for each data feed and redundant hardware configurations
- Integrates easily with market data applications via a Software Development Kit
- Connects directly to expressWay servers through colocation, private lines or extranet providers

### Benefits

**Reliable** – Ultra-low latency market data helps capture liquidity.

**Cost-efficient** – This rapidly deployed solution, outsourced to Mantara, alleviates the need for large cash outlays for dedicated lines and hardware.

**Designed for growth** – The product is designed on an advanced technology platform able to handle rapidly growing message volumes.
