

# expressWay

## RISK

expressWay™ Risk provides pre-, at- and post-trade risk management to the trading community. With this solution, traders can achieve immediate compliance with the SEC (Market Access) Rule 15c3-5, with near-zero impact on trading strategy latency.

Available as either a software or hardware implementation, it is easily installed on your existing hardware or integrated into your system. It supports all exchange protocols and individual exchange's field mappings and can be integrated without modification to preexisting client interfaces.

## Features

With expressWay Risk you can:

- Permit or block trading
- Set daily shares and gross value limits
- Set fat finger checks
- Monitor trading limits
- Monitor positions and P&L
- Monitor margin information including daily trading buying power
- View real-time alerts for order rejects and threshold warnings
- Implement via application or card-based solution

## Benefits

**Fast performance** – Risk checks add no latency to order processing ensuring industry-leading microsecond speeds.

**Accurate pricing** – Pre-trade risk management utilizes real-time pricing information from expressWay Market Data, offering fast, accurate risk calculation for order validation and pricing of risk checks and values.

**Flexible deployment** – Our solution manages protection on automated orders for full control of sponsored access relationships.
