

## User Profile

# BUY SIDE

### Challenge

It's all about speed. High-frequency trading firms, hedge funds and proprietary trading firms are feeling the increasing difficulty in generating alpha. Markets are changing quickly, latency is racing to zero and the regulatory landscape is more and more burdensome.

### Solution

expressWay™ by Mantara delivers the speed and functionality the buy side needs to excel. With high-speed order routing gateways with fix and native protocol, colocation and hosting of strategy servers and a quick, broker-customizable pre-trade risk solution, it is a valuable tool in the race to alpha.

### expressWay

- ▶ **expressWay Market Data** is an easy to deploy ultra-low latency ticker plant appliance that is fast and economical.
- ▶ **expressWay Risk** provides minimally invasive, ultra-low latency pre-trade risk controls and aggregated risk views.
- ▶ **expressWay Connectivity** offers cost-efficient hosting and colocation services at exchange facilities. Our native API provides the ability to translate to all exchange protocols on outbound orders.

### Impact

Firms grow based on alpha generated on trading. With expressWay, the buy side has microsecond-fast, nearly transparent access to the markets. This high-performance enables them to reach liquidity first and supports the generation of trading returns.
